

American Pan[®] Coatings

Our coating options for new and refinished pans consistently deliver more releases, sometimes twice the releases, than all other competitors worldwide. Our extensive recoating facilities and Life Cycle Management Program provide bakeries with a cost-effective solution to baking pan management.

American Pan[®] Coatings

Coating	Approximate # of Releases*	Recoating Locations
Fluoropolymers		
DuraShield [®] : Our DuraShield coatings provide the longest lasting release life and the best release characteristics for baked goods from buns and rolls to breads and cakes.	2500 - 5000	Brazil, Mexico, Romania, Spain, UK, USA
OptiShield [®] : Our OptiShield fluoropolymer coatings have been developed to provide a durable solution for conditions where a standard coating will not perform. Whether you have an extremely sticky dough or extreme temperatures, we have a formulation that will work for your operation.	1500 - 3500	
Rubberized Silicone		
FlexiCoat : Our rubberized silicone coating is a popular choice for coating baguette pans, baking screens, and other perforated trays to provide specific baking characteristics and results.	800 - 2000	Brazil, Spain
Silicone Glaze		
AMERICOAT [®] : Our silicone glaze coating can be used for virtually any product and can significantly reduce the amount of oil needed for your baking process.	300 - 600 without use of oil; up to 1000 with oil	Brazil, Canada, Colombia, Mexico, UK, USA

*Note that this is an approximate number and may not be the exact number of releases achieved. For specific information that relates to your operation and products, contact your sales representative.
